SUMMARY

Senior Product Manager operating at principal scope, building enterprise platform tooling, AI-driven automation, and data products in compliance-heavy environments. I ship the working prototype, not just the spec — I wrote the 0→1 migration tool's prototype myself in Claude Code, and it's in production today. Two years at UKG protecting 300 enterprise customers (\$250M ARR) through a multi-year platform migration: owned product strategy and roadmap, drove influence across product, engineering, and services without direct authority, and scaled the org's first organized AI capability layer with no top-down mandate. Twenty years in enterprise software overall — a decade prior at Broadridge running 40+ enterprise deployments where trust, compliance, integration, and audit rigor were the product, not a checkbox.

EXPERIENCE

Senior Product Manager Jun 2024 – Apr 2026

UKG | Lowell, MA | \$250M ARR | Enterprise platform tooling, AI capability, and data products protecting enterprise customers through migration

- **Built a 0→1 self-serve migration tool — idea to engineering-ready in one week.** Took it from concept through three business-epic decomposition (UI, rules, deployment), wrote the working prototype myself in Claude Code, designed the UX feedback loop and persona, and handed engineering a complete delivery package — bepsics, epics, stories, Gantt, roadmap. In production with the first customer cohort — 6 enterprise accounts in flight, Services running migrations without an engineering ticket, Services-Consultant feedback loop active.
- **Built UKG product's first organized AI capability layer.** Started as a personal automation library; built it into a shared repo 20 PMs could pull from, ran the first peer group, and sat with two PMs directly to configure it for their own use cases. Designed from the start to spread without a mandate — shared infrastructure, not personal tooling, because the only adoption that lasts is the kind nobody had to order.
- **Designed a five-panel operational analytics product** classifying open issues across customer escalations, code defects, internal bugs, CVEs, and noise across four products; auto-refreshed daily, with a Claude Code function I built into the tool surfacing the single highest-leverage action per panel. Cut the working defect list ~97% — roughly 200 apparent issues resolved to a real five — so engineering triaged signal, not noise. Opinionated routing, not a dashboard.
- **Built an ARR-risk model for the upgrade program** scoring the top 10 accounts on a blend of ARR exposure, reported-case volume, true-defect count, and Salesforce sentiment — not raw ticket counts. Automated weekly reporting routed every open blocker to the program lead; live tracking surfaced aging issues before they escalated.
- **Served as the product-side voice on enterprise customer escalation and pre-upgrade calls** — synthesizing what 300 enterprise customers (\$250M ARR) actually needed versus what was on the roadmap, feeding that gap back into prioritization and tradeoff decisions across product, engineering, and GTM.
- **Designed sprint health instrumentation** refreshing every 15 minutes across two engineering teams, with documented rejection criteria for burndown, velocity, and story-point anti-patterns — each with technical rationale. Built for signal, not ceremony.

Brand Champion, UKG North America Regional Lead 2026 | Fire Up ERG (women and allies), Business Innovation workstream lead

Business Analyst Jan 2014 – Jun 2024

Broadridge Financial Solutions | Andover, MA

- Led 40+ enterprise client deployments end-to-end in a compliance-grade financial services environment; partnered deeply with engineering on system behavior, data flows, integration dependencies, and security/audit standards, and developed strong instincts for regulatory consequence and enterprise purchasing trust.
- Internal SME for an omni-channel communication product adopted across the full enterprise client base; translated complex compliance and configurability requirements into workflows non-technical buyers could operate without support.

Sr. Document Development Analyst Jan 2006 – Jan 2014

Broadridge Financial Solutions | Andover, MA

SKILLS AND FOCUS AREAS

Product: Enterprise & platform PM, product strategy & 2–3 year vision, OKRs and roadmap ownership, prioritization and tradeoff decisions in ambiguous systems-level spaces, 0→1 product building, end-to-end delivery from prototype to production, influence across Product/Engineering/GTM/Security/Legal without direct authority, B2B SaaS

AI as Co-Builder: AI-driven automation, Claude Code prototyping, agentic workflows, AI-fluent product development, technical-systems fluency (APIs, data models, architecture, integration tradeoffs), PM automation, zero-translation building

Data & Analytics: Operational analytics products, opinionated instrumentation, composite risk modeling, customer-data and signal synthesis, KPI/OKR definition, automated reporting cadence, qualitative-to-structured synthesis

Enterprise & Governance: Compliance-grade enterprise delivery, trust/compliance/security standards, scalability and configurability tradeoffs, integration-dependency management, executive customer engagement, RFP- and escalation-room presence

Tooling: Jira, Confluence, GitHub, SQL, Slack MCP, Claude Code CLI

EDUCATION

Bachelor of Science, Management Information Systems and Management

Manning School of Business, UMass Lowell | 1999

WRITING AND THOUGHT LEADERSHIP

The Unofficial Leader (Substack) | theunofficialleader.substack.com

Weekly publication on AI adoption, unofficial leadership, and what's happening beneath the surface of how teams work. Originator of the Zero-Translation Building framework. Active LinkedIn audience engagement on product, AI adoption, and team dynamics.
